Amendment to the Abstract

Please replace the abstract with the following abstract:

A system and method ~~is described comprising:~~ for testing application program code within the presentation layer of an application server. A ~~providing a~~ user interface is provided for entering data and triggering one or more actions to process the data; ~~translating~~ the data and/or actions are translated to a presentation layer format; ~~receiving~~ results of the data and/or actions are received in a presentation layer format; and ~~storing~~ the entered data, actions and/or results are stored in the presentation layer format within a test script, the test script usable to test an instance of an application at the presentation layer of the application.

~~Also described is a method for testing an application comprising: transmitting a series of presentation layer data and associated actions to an instance of a presentation layer of an application, the application processing the test data and associated actions; receiving presentation layer results of the associated actions; and comparing the presentation layer results to recorded presentation layer results to ensure that the application is functioning properly.~~
